

3-Hours school tour in Barcelona

22@Barcelona - the coolest district of Barcelona

*Travel to the
future today!*

On the tour we get to know Barcelona's 22@ district with its contemporary architecture landmarks and its innovative approaches to urban development.

The project 22@Barcelona was started in 2000 and is one of the most ambitious urban renewal projects in the world. Target is to transform the historic but dilapidated industrial district of Poblenou into a dynamic and innovative district.

The tour explains the development of the past 20 years and leads us to some of the spectacular new buildings such as the "Torre Agbar" by Jean Nouvel or the Media-TIC by Enric Ruiz-Geli.

The district is also home of one of the first so-called superblocks. Nine city blocks are combined here and the traffic is routed around the super block. Pedestrians and cyclists have priority within the Superblocks and only local and delivery traffic is possible. Now children can play in the former traffic-dominated areas and the streets became public areas.

The tour includes a competition with quiz questions to make it fun for the students.

Duration: 3 hours

Number of participants: max. 25

Transportation: by foot

Price: upon request

Included services: Experienced guide, organization
