

Bicycles in Freiburg

Bike Tour of the bicycle highlights of the Green City

The first cycle path map already existed in Freiburg in 1970. Since then, the share of cycling in the city has increased from 15% to over 30%. 420 km of bike-friendly routes, over 5,000 bike parking spaces in the city center and the bike station at the train station are the reasons for this increase. With the implementation of the 2020 bicycle traffic concept in Freiburg, the bicycle became the city's most preferred method of transportation. Around 30 million euros are currently being invested in high-speed cycle paths that are free of crossings where possible. A guided bike tour is the best way to experience the city's most interesting bicycle projects.

Travel to the
future today!

Official Partner of:

GREENCITY
FREIBURG
